

List () Function

This is used to create a list. It returns a mutable list of elements.

Syntax:-

`list()` ← Creates Empty List

`list(iterable_object)` ← Creates a list of elements

Ex:-

`list()`

`list("GeekyShows")`

List () Function

We can use list and range function to create a list.

Syntax:-

```
list(range(start,stop,stepsize))
```

Ex:-

```
list(range(0, 5))
```
